

Patient History and Physical

Mr. DAVID SCHWARTZ (000727004).

Chief Complaint: Left lower leg open wound

HPI: Mr. SCHWARTZ is a 59 year old male with a history of DVT (453.40) (left lower extremity after hip surgery march of 2012), Other (hyperthyroid asthma), who we are seeing for a Wound of the Left, Lateral Lower Leg and a Wound of the Left, Medial Lower Leg. Mr. SCHWARTZ came to our clinic on 05/13/2013.

Significant Events/HPI :

Wound #	Location	Date First Noticed	Description	Status
1	Lower Leg Left, Medial	12/24/2012	crush injury	Active
2	Lower Leg Left, Lateral	12/24/2012	skin graft post fasciotomy	Active
Wound #	1			
Medical Treatment	AntibioticUse (a 6 week course of Bactrim, and a 1 week course of Cipro)			
Surgical Treatment	Graft Or Flap (The patient had a skin graft to the lateral leg on the 27th of December.), Other (The patient had a fasciotomy on the 24th of December.)			
Notes				
Wound #	2			
Medical Treatment	AntibioticUse (several courses of Bactrim)			
Surgical Treatment				
Notes	The patient sustained a fracture to his Tib/Fib 12/24/2012 and had a fasciotomy. He had a skin graft to the lateral leg on 12/27/2012. He has been under the care of Dr. Robert Travis. Despite excellent care, including x-rays to rule out osteo, the wound is not healing. He is almost 6 months status post the skin graft, and referred to our wound care center for HBO consultation.
